

G-Probe™ Noninvasive Transscleral Laser Handpiece

Consistent Treatment, Ease of Use

Transscleral cyclophotocoagulation (TSCPC) has been shown to be a safe and highly effective method for lowering intraocular pressure in patients with uncontrolled glaucoma.

Features and Benefits

- Patented design offers ease of use and convenience for treatment in a supine position
- A simple, effective alternative to cryotherapy with less inflammation, fewer complications, shorter surgery time, and the opportunity for retreatments
- Ideal for efficient treatment in the office setting

G-Probe™ Noninvasive Transscleral Laser Handpiece

Side view of the edge of the G-Probe™ positioned on the limbus. Laser-emitting fiber is placed directly over the pars plicata to ensure delivery of the laser beam through the sclera and into the ciliary body.

Probe tip design supports precise placement around the circumference of the limbus. Laser applications are spaced one-half the width of the G-Probe footplate by aligning the lateral edge of the G-Probe on the center of the last application.

Posterior view of laser treatment applied to the ciliary body. Eyes are treated up to three-quarters of the circumference with approximately 18 applications to effectively reduce intraocular pressure.

Specifications

Compatible Laser System:

IQ 810™

OcuLight® SLx

OcuLight SL

Treatment Laser:

Infrared diode laser (810 nm)

Spot Size:

550 µm at fiber tip

Fiber Length:

6' (1.8 m)

Product Number:

11256 Standard Handle 2.5" (6.5 cm)

12044 Short Handle 2.0" (5.1 cm)

Specifications are subject to change without notice. IRIDEX, the IRIDEX logo, and OcuLight are registered trademarks and G-Probe and IQ 810 are trademarks of IRIDEX Corporation. All other trademarks are the property of their respective owners. Products are covered by one or more of the following US patents: 5,085,492; 5,088,803; 5,372,595; 5,511,085; 5,982,789; 6,327,291; 6,540,391; and 6,733,940.

Other US and International patents pending.

The G-Probe is intended for single use only.
